Industrial Engineer | Operations • Supply Chain • Project Management

WORK EXPERIENCE

Relocation & Professional Development

Study & Development | 02/2026 – 09/2026

Completed an A2 German course, continued developing Python and SQL skills, relocated to Germany and began actively seeking professional opportunities in the German job market.

Full-time — Construction Project Manager

Physical (physical.pt) — Vila Nova de Famalicão, Portugal | 10/2025 – 02/2026

Supported the company's expansion through construction and refurbishment projects. Relocated to Germany to pursue international career opportunities.

- Managed end-to-end construction and maintenance projects across multiple gym locations, including planning, budgeting and contractor coordination;
- Developed and tracked project schedules, ensuring alignment with scope, deadlines and cost constraints;
- Coordinated procurement and supplier activities, analysed technical drawings and layouts (CAD tools) to assess project requirements;
- Identified project risks and implemented corrective actions to ensure on-time, within-scope delivery.

Study & Development Period

Study & Development | 04/2025 – 09/2025

Completed Master's thesis and a Postgraduate programme in Engineering Project Management, while independently developing Python and SQL skills ahead of returning to the job market.

Full-time — Production Line Leader

Bosch Car Multimedia (bosch.pt) — Braga, Portugal | 03/2024 – 03/2025

Master's thesis project developed within Bosch. Transitioned after project completion to finalize the Master's degree and postgraduate studies.

- Joined Bosch to carry out a Master's thesis project within a large-scale manufacturing environment, leading daily operations across ~12 production lines and shift teams of ~50 operators;
- Monitored KPIs (OEE, Throughput, Yield, Downtime) using MES & ERP (SAP MM/PP) systems and Power BI, running daily performance meetings with maintenance, planning, logistics, engineering and quality stakeholders;
- Delivered a continuous improvement initiative (thesis project) that reduced scrap and increased throughput by ~5%.

Full-time — Production and Procurement Engineer

BysteelFS, DST Group (bysteel.pt) — Braga, Portugal | 07/2023 – 02/2024

Progressed from internship to a full-time Production and Procurement Engineer role, taking responsibility for production planning and manufacturing processes.

- Production planning for steel structures and façade systems, supplier coordination and outsourced production management;
- Coordinated outsourced production, selecting suppliers and monitoring execution considering budget, lead times and quality;
- Analysed technical drawings to define production requirements through CAD tools (SolidWorks, AutoCAD, Tekla, Revit).

WORK EXPERIENCE

Internship — Production and Procurement Engineer

BysteelFS, DST Group (bysteel.pt) — Braga, Portugal | 03/2023 – 06/2023

Initial phase of the full-time role — production planning support and onboarding into procurement processes.

Internship — Supply Chain Engineer

Ficosa Internacional (ficosa.com) — Maia, Portugal | 03/2021 – 05/2022

Re-engineered the packaging system through process analysis across logistics, production and procurement, reducing packaging costs as part of the Bachelor's thesis.

EDUCATION

Master's Degree in Industrial Engineering and Management

Instituto Politecnico do Cavado e do Ave, Barcelos, Portugal (ipca.pt) | 10/2021 – 06/2025

Thesis: "Analysis and Development of Work Methodologies Applied to Non-Conformance Resolution in Industrial Production".

Erasmus+ Exchange Program (within Master's)

University of Applied Sciences Upper Austria, Wels, Austria | 09/2022 – 02/2023

Academic exchange — coursework in Industrial Engineering and Management

Bachelor's Degree in Industrial Engineering and Management

Instituto Politecnico do Cavado e do Ave, Barcelos, Portugal (ipca.pt) | 09/2018 – 07/2021

Thesis: "Re-engineering of the packaging system"

CERTIFICATIONS

Cambridge C1 Advanced English Certification

Wall Street English, Vila Nova de Famalicao, Portugal | 10/2024 – 04/2026

Engineering Project Management

Universidade do Minho, Guimaraes, Portugal | 02/2025 – 06/2025

Mechanical Design — Solidworks

Dassault Systèmes | 06/2019

SKILLS

Engineering & Design: SolidWorks, AutoCAD, Tekla, Revit, Fusion360

Data & Systems: MES & ERP (SAP MM/PP), Python, SQL, Power BI, MS Excel

Project & Operations: MS Project, Production Planning, KPI Analysis, Continuous Improvement

Management: Stakeholder Management, Operations & Supply Chain, Project Management
